With the success of its previous series, and in the spirit of spreading knowledge and intelligence, we present to you our next series, the “7th International Conference on [Vascular Biology](#) and Surgeons Meeting” (Advanced Vascular2020) programmed to be held on Jul 20-21, 2020 in Prague, Czech Republic. A platform set to provide contemporary visions and keys to accelerate innovation. The conference is designed with an exceptional theme of “Experience an exponential advance in cardiac studies”.

This two-day event will cover Keynote sessions addressed by leading Cardiac experts, plenary talks and poster presentations by researchers and other academicians, workshop sessions, exhibition and B2B meetings conducted by leading companies. [Advanced Vascular2020](#) is one of the Cardiology Meetings which will be visited by all the recognized cardiologists, cardiology scholars, Cardiac fellows, residents, business professionals under one roof.

Advanced Vascular2020 anticipates 200+ participants from both industry and academia, 15+ Keynote speakers, 40+ Plenary speakers and poster presentations, 10+ Exhibitors, Innovative educational sessions, B2B meetings, Hands-on

Workshop and other special sessions.

A BIS Research report, titled 'Global Interventional [Cardiology](#) Market provided analysis and forecast from 2018 to 2027. It stated that the global interventional cardiology market was estimated at \$14.69 billion in 2017 and is anticipated to reach an approx. of \$24.96 billion by 2027. The global [interventional cardiology](#) market is expected to grow at a CAGR of 8.37% between the years 2018 & 2027. This is aided by the tremendous growth of healthcare budgetary allocation and technological advancements in the [medical device industry](#).

Moreover, the rising prevalence of cardiac diseases & a growing geriatric population are the main factors leading to the growth of the market. Increasing incidences of [cardiac disorders](#) and a rise in the older population are significantly impacting the growth of the interventional cardiology market. As a result, several companies are making arduous efforts by innovating new products or redesigning existing devices to attain better process efficiency. Therefore, to sustain in the highly competitive market, interventional cardiology is gradually becoming an indispensable solution for the [medical device](#) industry.
